

ACKNOWLEDGEMENTS

This Urban Design Framework has been prepared in cooperation with officers from the State Government, Hobart City Council and the Hobart Ports Corporation.

Urban design direction and advice have been provided by Barrie Shelton BA Hons (WA), MPlan (Adel), RAIA, MPIA. Barrie is an urban designer – with a broad educational background spanning geography, architecture, history and planning. He directs the graduate urban design program in the Faculty of Architecture at the University of Sydney, and consults in urban design.

In recent years, he has been Visiting Professor at the University of Central England, a Japan Foundation Fellow, and visiting lecturer at universities in Vietnam, China and Japan.

Barrie's international experience is balanced with local knowledge of Hobart and its waterfront – as the former Head of the Department of Urban Design at the University of Tasmania and winner of the 1986 Sullivans Cove Ideas Competition. He was subsequently the urban design consultant on the 1991 Sullivans Cove Planning Review (which received the RAPI national award for planning excellence). He was also a consultant on the review of the Oceanport proposal and consultant/co-author of the Princes Wharf Conservation and Development Plans.

This document has been prepared with graphic design advice and assistance from Thomas Bailey BEnvDes and Yuji Ji BEng (Urban Planning).
